Reasons for Allowance

5. The following is an examiner's statement of reasons for allowance: the essential difference from the prior art is setting a quality threshold for the fingerprint regions and calculating parameters of a ridge orientation function by minimizing errors between the ridge orientation values of a ridge orientation model and the ridge orientation values of fingerprint regions with higher quality than the quality threshold. These features in combination with the other elements of the claim and the base claim are not disclosed or suggested by the prior art of record.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
